

KRITIKA

Data Science Fresher

7051020745 | kriti.kashyp24@gmail.com | Jammu, J&K

PROFESSIONAL SUMMARY

Motivated and detail-oriented Data Science fresher with a strong foundation in statistics, Python, and data analysis. Proficient in NumPy, Pandas, Matplotlib, and OpenCV, with hands-on experience in real-time computer vision and data-driven projects. Eager to apply strong analytical and problem-solving skills to real-world datasets and grow as a data professional.

EDUCATION

Senior Secondary (Class XII)

JKBOARD, Jammu

Year of Passing: 2024

TECHNICAL SKILLS

- **Programming:** Python (Basics – Intermediate)
- **Data Analysis:** NumPy, Pandas
- **Data Visualization:** Matplotlib
- **Computer Vision:** OpenCV (cv2)
- **Tools:** MS Excel
- **Languages:** English

PROJECTS

QR Code Scanner

Technologies: Python, OpenCV (cv2)

- Built a real-time QR code scanner using Python and OpenCV that detects and decodes QR codes via live webcam feed.
- Implemented intelligent QR type classification — automatically identifies UPI Payment QRs (extracting amount), Website URLs, and plain Text QRs.
- Rendered visual bounding boxes around detected QR codes on live video frames for clear on-screen feedback.

SOFT SKILLS

- Analytical Thinking — strong ability to break down complex problems and identify patterns in data.
- Problem Solving — systematic approach to finding practical, data-driven solutions.
- Time Management — effectively prioritises tasks to meet deadlines consistently.
- Communication Skills — clearly conveys technical concepts to both technical and non-technical audiences.

INTERESTS

- Data Exploration — discovering insights and patterns in complex datasets.
- Learning New Technologies — continuously expanding skills in data science and machine learning.
- Working with Numbers and Patterns — applying mathematical intuition to real-world data problems.
