PROFESSIONAL SUMMARY

Results-driven Data Analyst fresher with a solid foundation in Python, statistics, and data analysis. Proficient in NumPy, Pandas, Matplotlib, Power BI, and OpenCV, with hands-on experience building data-driven applications and visualizing insights. Holds two Microsoft certifications in Power BI and AI Concepts. Skilled in data cleaning, trend analysis, and dashboard creation. Seeking an entry-level Data Analyst role to contribute to data-driven decision-making and KPI reporting.

SKILLS

Data Analysis & Statistics: NumPy, Pandas, Statistical Analysis, Data Cleaning & Validation, Trend Identification

Data Visualisation & Dashboards: Power BI (Microsoft Certified), Matplotlib, Dashboard Design, KPI Reporting

Programming: Python (Beginner–Intermediate); ETL Concepts (data extraction, transformation, loading pipelines)

Database & Reporting: MS Excel (data modelling, pivot tables, formulas); SQL (foundational knowledge)

AI & Machine Learning Fundamentals: Foundational AI & ML Concepts (Microsoft Certified), Computer Vision with OpenCV (cv2)

Soft Skills: Analytical Thinking, Problem Solving, Stakeholder Communication, Time Management

PROJECTS

Real-Time QR Code Scanner | Python, OpenCV (cv2)

- Designed and developed a real-time QR code scanner using Python and OpenCV that detects and decodes QR codes via live webcam feed — demonstrating core data extraction and ETL pipeline concepts.
- Implemented QR type classification to identify and parse structured data from UPI Payment QRs (extracting payment amount), Website URLs, and plain Text QRs — applying data cleaning and validation logic.
- Rendered dynamic bounding boxes around detected QR codes on live video frames, producing clear visual feedback — an approach aligned with data visualisation best practices.
- Conducted pattern analysis on QR code types to identify trends in data sources, demonstrating ability to derive actionable insights from raw data.

EDUCATION

Senior Secondary (Class XII) — JKBOSE Board, Jammu | Year of Passing: 2024

CERTIFICATIONS

Get Started Building with Power BI | Microsoft Learn | May 2026

Introduction to AI Concepts | Microsoft Learn | May 2026

INTERESTS & DEVELOPMENT FOCUS

- Data Exploration — uncovering patterns and business insights from complex datasets.
- Learning New Technologies — actively expanding skills in SQL, machine learning, and advanced Power BI features.
- Applied Mathematics — leveraging statistical and mathematical reasoning to solve real-world data problems.
